Technical Experience

08-2017 - present

Websites

- **Personal Website** built a personal website to showcase my portfolio. Designed with the Bootstrap 4 framework. Uses Java Script and PHP
- to enable client to send email directly from website. http://mylevitz.com
- **Sample Retail Site** built a large website to function as a sample retail site. Used complex code in the front-end and back-end, to enable a powerful user experience; getting info, searching, sorting, filtering, pages, security, and administration. PHP, MySQL, Bootstrap, Java Script, JSON, Ajax, and JQuery. https://mylsretail.mylevitz.com
- **Website** for a small business. Displays info about the business, and enables user to send email directly from site. Bootstrap, and PHP. http://shulamislaserhair.com
- **Google Scripts App** created an app for google spreadsheets. Allows user to set an alarm from within the site , display it and cancel it. Java Script and Google Scripts. https://docs.google.com/spreadsheets/d/1gUb2byl7PwvDdGeG67zJS0vinUpOk2dHPX12lMAz4pk/edit#gid=0

03-2017

School Projects

- **Minesweeper** created a version of the popular game. Using IO and Trees, enabled player to keep track of high scores. Java and Swing. https://github.com/mjscode/Minesweeper
- **Blog Site** using Rest API called data from outside the domain. Displayed users, their posts, and comments. Single Page Application. Java Script, JQuery, Ajax, and JSON. http://mylevitz.com/sampleBlog
- **Responsive Website** fully responsive website using only HTML and CSS. http://mylevitz.com/responsiveSite
